Thank you so much!

OBJECTIVES

Challenge the Experts in Diabetes Management: complex cases

- Describe at least one change in the ADA guidelines for inpatient management of diabetes
- Identify clinical strategies to differentiate between Type 1 diabetes, LADA, and type 2 low insulin secretors
- Explain the role of SGLT2 inhibitors in the treatment of advanced type2 diabetes
- Describe pharmacologic decision making for patients in the “doughnut hole” with limited financial resources

Low Risk Thyroid Cancer: to treat or not to treat

- Explain thyroid cancer pathology and risk stratify likelihood of recurrence.
- Describe long term management and optimal surveillance strategies for patients who undergo lobectomy versus total thyroidectomy
- Explain role of thyroid hormone suppression and the targets for low-risk patient
- Be able to identify which patients would be best to receive radioactive iodine therapy

COVID 19: Endocrine invasion and/or evasion

- Describe a mechanism by which COVID 19 causes endocrine complications
- Identify when it is appropriate to screen for Endocrine complications following COVID 19 infection
- Discuss clinical management of acute and chronic endocrine dysfunction following COVID 19 infection

How Not to Waste Your Life Doing Prior Authorization Forms

- Explain the kind of information required to successfully complete a Prior Authorization Form (PAF)
- Identify appropriate people who can complete PAFs
- Identify at least two strategies used to achieve better approval rates for drugs requiring PAFs

Indigenous Americans Conquering Endocrine Disorders: practice pearls

- Recall two strategies to help culturally empower native Americans with an endocrine disorder
- Explain what it means to culturally empower an ethnic group
- Identify at least one characteristic of a Native American healing belief system.

Obesity Management: is this the new hypertension?

- Identify two mechanisms by which GLP 1 receptor agonist facilitate weight loss
- Understand the role of set point in weight loss management
- Describe at least two different dietary patterns used in weight loss management

EVALUATION

ENS 4th REGIONAL SYMPOSIUM
10/15/2022 Chandler, Arizona
